EDUCATION

BSc IT(Software Engineering)

Eduvos

2023-2026

SKILLS

Programming Languages:

- Python(Primary)
- Java
- JavaScript

Computer Science:

- Data Structures
- Algorithms
- Object-Oriented Design
- Complexity Analysis

Web & Mobile:

- Android Studio
- Responsive Web Development
- REST principles

Systems & Networking:

- Cisco Packet Tracer
- Network Configuration
- Operating Systems

LANGUAGES

English
Afrikaans
Xhosa

ABOUT ME

I am a final-year Bachelor of Science in Information Technology (Software Engineering) student with Python as my primary development language and a strong foundation in data structures, algorithms, and object-oriented design. Experienced in developing Python-based systems, Android mobile applications, and responsive web applications through academic and freelance projects

I am a disciplined and goal-oriented individual who enjoys building practical, user-focused solutions. Through 9+ completed academic and freelance projects, i have developed a strong ability to transform business needs into scalable, user-focused software solutions while maintaining strong attention to performance and detail.

My career objective is to secure a software development role where I can apply and develop my skills, contribute to impactful projects, and grow as a professional software engineer.

PROJECT EXPERIENCE

Hospital Management System (Python)

- Designed and implemented a patient management system in Python with full CRUD functionality.
- Applied modular programming and data handling best practices
- Demonstrated logical design and problem-solving through structured workflows

Task Management System (Python)

- Developed a task tracking system supporting task creation, updates, and removal
- Focused on clean code structure and efficiency

Trip Planning Mobile Application (Java – Android Studio)

- Designed and developed an Android application enabling users to plan trips and calculate travel costs
- Implemented persistent storage and media integration features
- Applied OOP principles and structured application architecture
- Focused on usability, performance, and maintainable code

Web Development (JavaScript, HTML,CSS)

- Developed a responsive web application to improve business digital presence
- Implemented SEO best practices to increase search visibility
- Improved cross-device accessibility and performance
